

The Revival of Mining.

The San Francisco Bulletin has the following on the outlook for a mining boom on this coast:

The opinion that we are on the eve of a revival of mining on this slope is shared by Irwin C. Stump, who has just arrived from the East. Mr. Stump is well known as the ex-manager of the Haggin and Hearst properties, and has now charge of the Hearst estate. He was chosen for these responsible positions on account of his notorious conservatism; he is in fact one of those hard headed men who believe what they see, and little more. When such a gentleman says he looks for a genuine boom in mining in this country, the statement will command general attention.

His idea is partly based on the contagious character of mining booms. There is at this moment a perfect rage for mining investments in London, Paris and Berlin. Fortunes have been made out of the new gold mines in South Africa which have been so frequently mentioned in this column. For fifty miles along the apex of the gold-bearing reef at Wafnatersvand, near Fredericksburg, the ground has all been staked out, and locations made, and though some of the locators have put more money into the earth than they have taken out, others have realized fine profits by working ore which ran less than half an ounce of gold to the ton. The advent of South African millionaires is noted at the European watering places, just as the arrival of Californian millionaires used to be reported twenty years ago.

From South Africa the epidemic spread to Southwestern Australia, where fine nuggets have been found in the vicinity of Coolgardie, and a promising mine, which is known as the Londonderry, has been opened eleven miles from that town. The output of the district in 1894 was reckoned at a million sterling. Here the miners have encountered a serious obstacle in the shape of a scarcity of water, and it will take time to construct the water tanks for the building of which the Government of Western Australia has appropriated \$75,000.

In the meantime, leading American promoters, under the lead of John Mackay, D. O. Mills and Senator Jones, are preparing for the spread of the epidemic to this country. There is more gold-bearing territory in California, Nevada, Colorado, Utah, Montana and Idaho than there is in all South Africa, and the mineral which has been extracted is a mere atom in comparison with what remains. It has been figured that the Sierra alone in this State contains as much stored gold as the whole of the South African Republic.

A mining revival on this slope will be based on the new reduction processes which enables ores that were valueless twenty years ago to be worked profitably to-day. When the Con. Virginia petersed, nearly twenty years ago, ores carrying less than \$40 of precious metal were frequently thrown upon the dump. Ten years ago in the last days of Senator Sharon, an ore carrying less than \$20 worth of gold and silver was generally supposed to be worked for the benefit of the mill owner rather than the miner. Now the experience of the Black Hills miners has taught us that \$10 ore can be reduced with profit, and that there is money in ore which carries \$7 and \$8 worth of gold if it is not too refractory. The money of the future is to be derived from the low grade ore, and Nevada has yet to see her biggest mining days.

Oregon Goldbugs

Cleveland, June 3.—A letter was received at the National League headquarters today from H. I. Wells, Secretary of the Young Men's Republican Club, of Oregon. Wells writes that the delegates from Oregon will oppose any effort to commit the coming Cleveland meeting to any expression of opinion in favor of free coinage of silver at a ratio of 16 to 1 by the United States independently.

A Physical Impossibility.

A bashful country girl went into a grocery store at Lovelock the other day carrying some live chickens. The fowls had their feet tied to prevent their escape and the young woman in her confusion placed them on the counter. Now the young clerk is noted for his polite manners, but he is not always grammatical, and he smilingly inquired: "Are you sure they will lay there?" "Oh, n-n-no sir," she stammered, blushing, "they're all roosters," and the clerk hasn't done anything since.—Silver State.

Now is the season of the year when you lay in your supply of wall-paper. John G. Fox has some new designs and such a variety on hand that you cannot help be satisfied.

ICE. ICE. ICE.

The only pure ice in the market is that sold by Dr. J. M. Benton. It is cut on the Carson River—from pure, running water and not formed on stagnant pools, swarming with animal life. It is ice from mountain water that has its origin in the snow capped peaks of the Sierras and means health as well as coolness to the consumer.

An Offer.

A reduction in charges will be made for one year, to beginners, not older than eleven years. This offer is void after next September. For further information see Phillip Krall, teacher of piano. May 10

Keep Your Money at Home.

It should be the policy of Carson people to patronize every home industry. Support those who support the town by living among us and spending their money here. Such a man is Prof. Geo. Lamy, the instructor and tuner. Prof. Lamy's ability in all branches of his profession has been sufficiently demonstrated, and above all he is a resident and citizen of Carson. Engage him and keep your money at home. m12

Fishing Tackle.

"Salmon Egg" trout bait, assorted straight, cane poles, all sorts of new hooks and lines, baskets and other fishing tackle. Just received at Cagwin and Noteware's.

Ice! Ice! Ice!!!

Go to Fred Wilder for the purest of ice. Frozen from artesian well-water, and delivered to any part of the city at the lowest rates.

The Standard Bred Trotting Stallion, Waterford.
